

**REMARKS / ARGUMENTS**

Claims 1-8, 18 and 21-28 are pending in the present application.

Each of the present independent claims 1, 5 and 8 includes a limitation not disclosed by, nor made obvious in view of Welker or other prior art. For example, these independent claims recite sensing a "three-dimensional position" or "three-dimensional orientation".

Note that Welker only discloses determining whether monitors are "adjacent" in position and whether the monitor is in a "landscape vs. portrait" orientation. See, e.g., Welker's Abstract and at col 1, lines 54-55. Welker's use of sensors at the edges of the monitors can not be used to determine a "three-dimensional position" of a monitor. Nor can they be used to determine a "three-dimensional orientation" in space of a monitor.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case. If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-279-5098.

Respectfully submitted,
